

4-Chlorobenzotrifluoride

4-Chlorobenzotrifluoride (PCBTF) is a clear liquid and it is a stable and non-corrosive product.

It is widely used as a solvent in paints and coatings, maskants, adhesives, sealants, inks and cleaning applications for metal and electronic articles.

PCBTF provides excellent physical properties, such as high solvency, high flash points and water resistance.

It also replaces traditional solvents because it has no VOCs and HAPs.

Description: 4-Chlorobenzotrifluoride
para-chlorobenzotrifluoride
(CAS 98-56-6)

MAIN TYPICAL PROPERTIES

Appearance:	clear, colourless liquid free of suspended matters
Liquid Density at 15,5 °C:	1,353 g/mL
PH (in solution 1/1 water):	3,65
Boiling point:	140,6 °C
Freezing Point:	- 36 °C
Flash Point:	46,6 °C
Decomposition Temperature:	> 280 °C
Vapor Pressure at 25 °C:	10,47 hPa
Surface Tension:	25 dynes/cm
Solubility in water at 23 °C:	< 100 mg/l
KB Value:	64

PACKAGING

Steel drums of 270 kg net each

DISCLAIMER

All data contained in this document are based on our best available knowledge and given in good faith for the indicated applications. Given the variety of formulations and operative conditions, no liabilities can be issued for an incorrect and unsafe use of the product. Please also refer to the safety datasheet (MSDS) for any further information regarding this product.
